DETAILED ACTION

1. Applicants' response filed on August 21, 2008 has been considered and acknowledged.
3. The following is an examiner's statement of reasons for allowance:

Claims 90-94, 96-97, 100, 102, 113-124, 126-139, 141-164, 167-178 are allowed.

The present invention is drawn to a diverse population of uniquely labeled probes comprising thirty or more target-specific probes that each has a detectable signal that distinguishes it from the other polynucleotide probes of the population, wherein each of said polynucleotide probes comprise a target-specific region and a region comprising a plurality of genedigits linked together in a unique combination, each genedigit being a predetermined sequence and each genedigit is attached to a corresponding anti-genedigit having unique label monomer or a unique combination of label monomers. The closest prior art Barbera-Guillem in view of Tanke et al. teach said diverse population of labels, however the closest prior art did not teach 30 or more target-specific probes each having distinguishable signal and each probe comprising a target-specific region and a region comprising a plurality of gene digits, wherein each genedigit is attached to a corresponding anti-genedigit having a unique label monomer or a unique combination of label monomers. Thus the instant invention was not taught or obvious over the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suryaprabha Chunduru whose telephone number is 571-272-0783. The examiner can normally be reached on 8.30A.M. - 4.30P.M, Mon - Friday.
